

Dr. Bill Stokes:

Please eliminate animal testing completely.

Let me put it to you this way. Does might make right? Do we test on animals because it is RIGHT to do so? Or because we have the POWER to do so, and are not over concerned about what is ultimately right?

I do care about what is ultimately right. In fact, I did my doctoral thesis on animals and ethics. Please, eliminate animal testing completely--causing pain to other animals, and/or killing them, simply because we have the power to do so, and feel it may give us some advantage, is not how we *ought* to behave.

Thank you for inviting comment from the public.

Dr. L. A. Kemmerer
